Annotation: The transition to higher education is a critical phase in students' academic and personal lives. Adaptability plays a crucial role in determining their success and well-being in this new environment. This study explores the adaptability of students to higher education institutions, identifying key challenges they face and strategies that can facilitate their adjustment. A mixed-methods approach was utilized, combining quantitative surveys with qualitative interviews. The results indicate that academic demands, social integration, financial constraints, and mental health issues significantly impact students' adaptability. The study concludes by recommending institutional interventions and student-driven strategies to enhance adaptability and academic success.

Key words and phrases: Adaptability, Higher education institutions (HEIs), academic challenges, social integration, financial constraints, mental health, student success, transition to university, coping mechanisms, , institutional support.

Annotatsiya: Oliy ta'limga o'tish talabalarning ilmiy va shaxsiy hayotidagi muhim bosqichdir. Moslashuvchanlik ularning ushbu yangi muhitda muvaffaqiyati va farovonligini aniqlashda hal qiluvchi rol o'ynaydi. Ushbu tadqiqot talabalarning oliy ta'lim muassasalariga moslashuvini o'rganadi, ular duch keladigan asosiy muammolarni va ularni moslashtirishga yordam beradigan strategiyalarni aniqlaydi. Miqdoriy so'rovlarni sifatli intervyular bilan birlashtirgan aralash usullardan foydalanildi. Natijalar shuni ko'rsatadiki, akademik talablar, ijtimoiy integratsiya, moliyaviy cheklovlar va ruhiy salomatlik muammolari talabalarning moslashuviga sezilarli darajada ta'sir qiladi. Tadqiqot moslashuv va akademik muvaffaqiyatni oshirish uchun institutsional aralashuvlar va talabalar tomonidan boshqariladigan strategiyalarni tavsiya qilish bilan yakunlanadi.

Higher education institutions (HEIs) represent a transformative phase in students' lives, offering opportunities for personal and professional development. However, students often struggle to adapt due to differences in academic expectations, social environments, and personal responsibilities. Adaptability, defined as the ability to adjust to new conditions effectively, is crucial in navigating this transition. The purpose of this study is to analyze the factors influencing student adaptability and propose strategies that can support their integration into HEIs.

A mixed-methods approach was adopted to provide a comprehensive understanding of student adaptability. A quantitative survey was conducted among 500 first-year university students across various disciplines to assess their challenges and coping mechanisms. Additionally, 20 in-depth interviews were held with students who demonstrated high and low adaptability to capture their lived experiences. The survey included questions on academic performance, social integration, financial stability, and psychological well-being. Qualitative data were analyzed thematically to identify recurring patterns and narratives.

Academic Challenges:

68% of students reported struggling with increased academic workload compared to high school.

Many faced difficulties in time management, critical thinking, and independent learning.

Social Integration:

45% of students felt isolated in the initial months, highlighting the need for social support networks.

Students who participated in extracurricular activities reported better social adaptability.

Financial Constraints:

55% of students indicated that financial difficulties affected their academic performance.

Students with part-time jobs faced challenges balancing work and studies.

Mental Health and Well-being:

60% reported experiencing stress and anxiety due to academic pressures and social expectations.

Counseling services were underutilized due to stigma or lack of awareness.

Discussion The findings highlight the multifaceted nature of adaptability in HEIs. Academic challenges underscore the need for better preparatory programs that equip students with essential skills before entering university. Social integration can be improved through mentorship programs and peer support groups. Financial constraints necessitate more scholarship opportunities and financial literacy training. Addressing mental health concerns requires increasing awareness and accessibility of support services.

Adaptability is a key determinant of student success in higher education. Institutions must implement targeted interventions to support students in overcoming academic, social, financial, and mental health challenges. Future research should explore longitudinal impacts of adaptability interventions to further enhance student experiences in HEIs.
