<b>3. Projections of Points and Lines</b>	<b>48</b>
3.1 Introduction	48
3.2 Orthographic Projections	48
3.3 First Angle Projections of a Point	50
3.4 Second, Third, and Fourth Angle Projections	51
3.5 Conclusions about Projections of Points	53
3.6 Projections of Lines	54
3.7 Angles Made by Lines with the Reference Planes	55
3.8 Projections of Lines Parallel to One and Inclined to the Other Reference Plane	56
3.9 Projections of Lines Inclined to Both the Reference Planes	61
3.10 Points to Remember	65
3.11 Procedure for Solving Problems of Lines Inclined to Both the Reference Planes	66
3.12 Traces of a Line	69
3.13 Procedure for Locating the <i>HT</i> and the <i>VT</i>	70
3.14 Procedure for Solving Problems Having the <i>HT</i> and/or the <i>VT</i> as a Part of the Given Data	71
3.15 Side Views	74
3.16 Shortest Distance Between a Given Line <i>AB</i> and Ground Line <i>XY</i>	75
<i>Exercise III</i>	42
<b>4. Projections on Auxiliary Reference Planes</b>	<b>85</b>
4.1 Introduction	85
4.2 Projection of a Point on an Auxiliary Vertical Plane ( <i>AVP</i> )	88
4.3 Projection of a Point on an Auxiliary Inclined Plane ( <i>AIP</i> )	88
4.4 Procedure for Drawing Auxiliary Front View ( <i>AFV</i> )	89
4.5 Procedure for Drawing Auxiliary Top View ( <i>ATV</i> )	89
<b>5. Projections of Planes</b>	<b>92</b>
5.1 Introduction	92
5.2 Angles between a Plane Surface and a Principal Plane of Projection	92
5.3 Projection of Planes Parallel to the <i>VP</i>	93
5.4 Projections of Planes Parallel to the <i>HP</i>	94
5.5 Projections of Plane Surfaces Perpendicular to the <i>VP</i> and Inclined to the <i>HP</i>	95
5.6 Projections of a Plane Surface Perpendicular to the <i>HP</i> and Inclined to the <i>VP</i>	96
5.7 Conclusions Regarding Projections of Planes Perpendicular to One and Parallel or Inclined to the Other Reference Plane	97
5.8 Projections of Plane Surfaces Inclined to Both Reference Planes	97
5.9 Drawing Projections of Planes when Shape and Size in Either Front View and/or Top View Are Given	109
<i>Exercise V</i>	113

<b>6. Projections of Solids</b>	<b>119</b>
6.1 Introduction	119
6.2 Solids	119
6.3 Orthographic Projections of Solids	123
6.4 Projections of Solids Having Axis Perpendicular to One of the Reference Planes	124
6.5 Projections of Solids Having Axes Parallel to Either the <i>HP</i> or the <i>VP</i> and Inclined to the Other	129
6.6 Hints for Drawing Two-step Problems	132
6.7 Position of Axis	135
6.8 Visibility of Surfaces	137
6.9 Projections of Solids Having Axes Inclined to Both the <i>HP</i> and the <i>VP</i>	145
<i>Exercise VI</i>	155
<b>7. Sections of Solids</b>	<b>168</b>
7.1 Introduction	168
7.2 Cutting Planes ( <i>CP</i> )	169
7.3 Drawing of Sections and Sectional Views	169
7.4 Procedure for Drawing Sectional Views	171
7.5 Locating the Position of the Cutting Plane When the True Shape of the Section is Known	178
7.6 Procedure for Locating the Cutting Plane When the True Shape of a Section is Given	179
<i>Exercise VII</i>	183
<b>8. Curves of Intersection of Surfaces</b>	<b>186</b>
8.1 Introduction	186
8.2 Methods of Determining the Curve of Intersection or the Curve of Interpenetration	187
8.3 Line Method	187
8.4 Procedure for Drawing Line of Intersection of Surfaces of Two Solids by the Line Method	187
8.5 Visibility of the Curve of Intersection	191
8.6 Deciding Portions of Lines that are Cut off from Penetrated Solid	192
8.7 Deciding Visibility when a Solid has a Hole	195
8.8 Cutting Plane Method	198
8.9 Procedure for Drawing the Curve of Intersection of Surfaces in Orthographic Projections Using the Cutting Plane Method	199
<i>Exercise VIII</i>	203
<b>9. Development of Surfaces</b>	<b>207</b>
9.1 Introduction	207
9.2 Methods for Drawing Developments of Surfaces	208

9.3 Line Method for Drawing Development of a Cut Solid	212
9.3.1 Procedure for Drawing Development by the Line Method	212
9.4 Cutting Plane Method for Drawing Development of a Cut Solid	220
<i>Exercise IX</i>	224
<b>10. Multiview Orthographic Projection</b>	<b>231</b>
10.1 Introduction	231
10.2 Multiview Orthographic Projection	231
10.3 Multiview Orthographic Projection of Objects Bound by Plane Surfaces	241
10.4 Reading a Pictorial View	241
10.5 Rules to Recognise the Position of Each Line or Surface of an Object in a Pictorial View	242
10.6 Misleading Conditions in Pictorial Views	250
<i>Exercise X</i>	252
<b>11. Sectional Views</b>	<b>259</b>
11.1 Introduction	259
11.2 Projection of Sectional Views	259
11.3 Hatching Lines	260
11.4 Procedure for Drawing Sectional Views of Machine Parts	262
11.5 Types of Sectional Views	265
11.6 Full Sectional View	266
11.7 Half Sectional View	266
11.8 Offset Sections	266
11.9 Revolved Section	267
11.10 Removed Section	268
11.11 Partial Section or Broken Section	269
<i>Exercise XI</i>	278
<b>12. Dimensioning</b>	<b>285</b>
12.1 Introduction	285
12.2 Dimensioning	285
12.3 Dimensioning Systems	287
12.4 Dimensioning Principles	288
12.5 Dimensioning Pictorial Views	292
<i>Exercise XII</i>	294
<b>13. Auxiliary Views</b>	<b>295</b>
13.1 Introduction	295
13.2 Front Auxiliary View	295
13.3 Top Auxiliary View or Auxiliary Elevation	298
13.4 Side Auxiliary View	300
